

Hello!

Have you ever wanted to shoot me in the face? Well, now's your chance. Every hundred days I get a different photographer in to take a special shot of me that shot goes up fully credited on my IG selfie-a-day feed as well as on my website. The website listing will include a link to your work, a short bio provided by you in which you can say whatever you'd like about yourself and you art, as well as a short blurb from me about the shooting of the image itself and what I love about your work.

### **What I need from you:**

I'll need a quick little bio, a link to your work (gallery, socials, doesn't matter, just a link to your presence).

### **What you need to commit to:**

One single Instagrammable image shot and edited on the same day. Shot in whatever style you would like. You can dress me up however you like, you may make any non-permanent changes to my face you would like (short of violence etc please...). The only rules are that they must adhere to IG's rules, and you can't cut my beard (style it however you wish though)

**No money will change hands either way, this is just for fun. If anyone spoofs me asking for cash, that's not me.**

If you're interested; email me your bio, link, and availabilities. I would love to hear from you, and look forward to working with you.
